
Hide or Show RFP References

As an evaluator, you need to make sure that the section is responding to the RFP requirements.

The Proposal Manager has developed an outline based on all the requirements from the RFP. Each Paragraph heading is followed by the instructions from the RFP. These RFP references can be shown or hidden by clicking the Hide or Show command in the RFP reference group.

To use these buttons, *click the hide* button to hide all requirements and the *show button* to show all requirements. It is very easy to toggle between the two.
